Artificial Intelligence off-site monitoring human presence detection.

It is impossible for the human eye to focus on 500 cameras at once. With the BLACK BOX artificial intelligence the possibilities are endless. Once the BLOEMEYE control room receives an activation we are directly diverted to the live view of the cameras. We are then able to log in and view footage. With an activation the artificial intelligence is able to specify between human, animal, vehicle and background. BLOEMEYE is able to set the camera's main focus to human presence for the most accurate alarms.

WHEN CHOOSING A SECURITY COMPANY MAKE SURE THEY ARE AFFILIATED WITH SAIDSA, AS THIS CAN HAVE AN AFFECT ON YOUR PROPERTY INSURANCE AND QUALITY OF EQUIPMENT AND SERVICE

BLOEMSEC LOAD SHEDDING TIP

Load shedding and the effects it has on your security alarm system can cause serious financial implications and also put you in a vulnerable position. Bloemsec always strive to do our best to make load shedding more bearable for you, our client.

Testing your alarm system on a regular basis is vital. Bloemsec made this more convenient for you by using your Bloemsec Security App.
